PROFESSIONAL SUMMARY

Detail-oriented Data Analyst with hands-on experience in SQL, Python, and Power BI. Proven ability to collect, process, and analyze large datasets, develop interactive dashboards, and deliver actionable insights that support data-driven decision-making. Experienced in ensuring data quality, building predictive models, and collaborating with cross-functional teams to translate business needs into analytical solutions.

EDUCATION

Sanjivani College of Engineering, Kopargaon — B.Tech in Information Technology (CGPA: 7.5) | Expected: 2026

TECHNICAL SKILLS

Languages & Querying: Python, SQL, Java
Data Analysis & ML: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Deep Learning
Visualization & BI Tools: Power BI (DAX), Tableau, Tableau Prep
Databases & Big Data: SQL, MongoDB, Apache Spark (Scala)
Other: HTML, CSS, Data Validation, Predictive & Prescriptive Analytics, Agile

INTERNSHIP EXPERIENCE

Data Analyst Intern — Zidio Development | 3 Months

- Collected, cleaned, and processed large datasets ensuring data integrity and quality for downstream analysis.
- Built interactive Power BI dashboards with KPI visualizations enabling Operations Management to monitor performance in real time.
- Assisted in predictive modeling using ML algorithms to generate actionable business insights.
- Performed regular data validation and cleansing to maintain accuracy and reliability of reporting systems.

AI/ML Intern — Yuan Ze University, Taiwan (Remote) | 3 Months

- Conducted research in AI and ML applications, developing and optimizing deep learning models for real-world scenarios.
- Implemented advanced data preprocessing and feature engineering techniques to improve model accuracy and reliability.
- Analyzed experimental results and presented findings to research team, translating complex insights into clear recommendations.

PROJECTS

Real-Time Sales Analytics Dashboard

- Built an end-to-end data pipeline using Scala and Apache Spark to process and analyze large-scale sales datasets from multiple sources.
- Developed an interactive Power BI dashboard with DAX measures computing YoY growth, profit margins, and sales variance for monthly and regional performance.
- Implemented drill-down features providing granular insights into regions, products, and sales representatives to support strategic decision-making.

Financial Reporting and Forecasting System

- Designed a financial dashboard tracking income, expenses, and cash flow; cleaned and transformed raw financial data using SQL and Tableau Prep for accurate reporting.
- Integrated Power BI for budget vs. actual comparisons with dynamic slicers, filters, and custom user views to support data-driven financial decisions.
- Conducted exploratory data analysis to identify spending patterns and cost-saving opportunities, improving forecasting accuracy.

AI-Powered Workforce Analytics System

- Built an employee sentiment and mood analysis system using Python and ML models, integrating text, speech, and facial expression analysis for real-time insights.
- Developed stress alert mechanisms and data-driven task recommendation engine to optimize workplace productivity using predictive analytics.
